Larry,

Focusing on the eco evaluation works for me. It would be helpful if they could give us some detail on the site specific option (since the default robin/earthworm scenario has limited applicability at Hanford). Maybe they could use Horseshoe Landfill as a working example (as we've done with regards to DDT).

Jamie

Subject: MTCA presentation

Hi all - as you have seen from the agenda for next weeks meeting Curtis Dahlgren and Michelle Wilcox will give a presentation on the new MTCA rule. Right now their intent is to focus on the terrestrial ecological evaluation sections. Will this approach work for you? Are there other areas you would like them to address?
